

Evaluation - AU Summer University 2015

About the evaluation survey

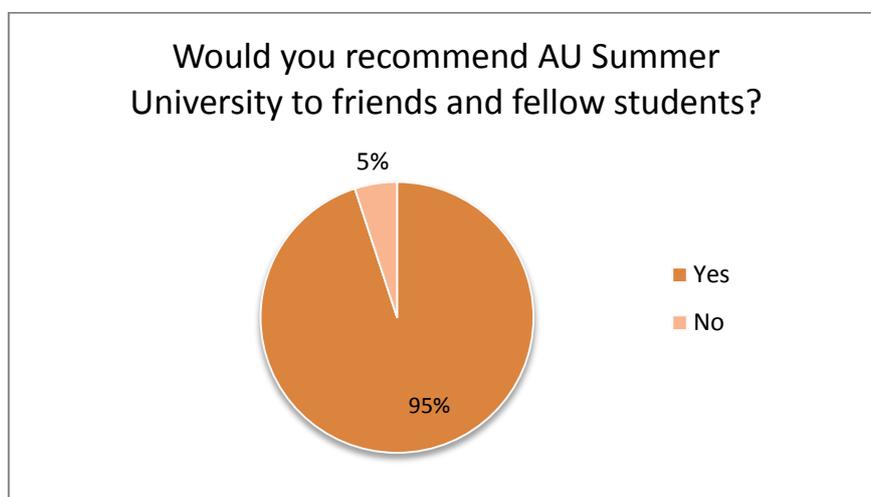

Every year AU Summer University asks the students to evaluate their experience on AU Summer University. This year 548 students answered the questionnaire. This document is based on their answers, and it gives you the chance to take a look through the students' evaluation of last year's summer university. We have collected some of the questions from the survey which could be interesting for you as a future student at AU Summer University.

The overall experience

We start with the (maybe most important) question which concerns the overall experience of AU summer University. We are happy to see a great satisfaction with AU Summer University. 88 % of the students who answered this question were satisfied with their experience at Aarhus University.

Furthermore we asked the students, if they would recommend AU Summer University to a friend. 95 % of the students would recommend AU Summer University to a colleague or a friend.

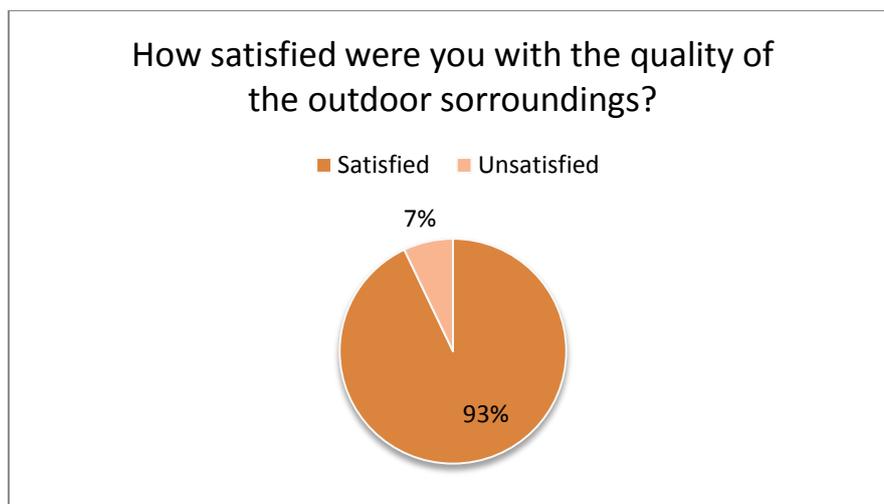

The University Park

The beautiful University Park creates the perfect framework for both thorough studying and relaxation. The park is isolated from traffic and noise. The only noise you will hear is from the ducks in the lakes and the chit-chatting between students. The classrooms, library and study halls used for AU Summer University are located in the north-eastern part of the park. This means that you will be able to enjoy the park every day during your stay!

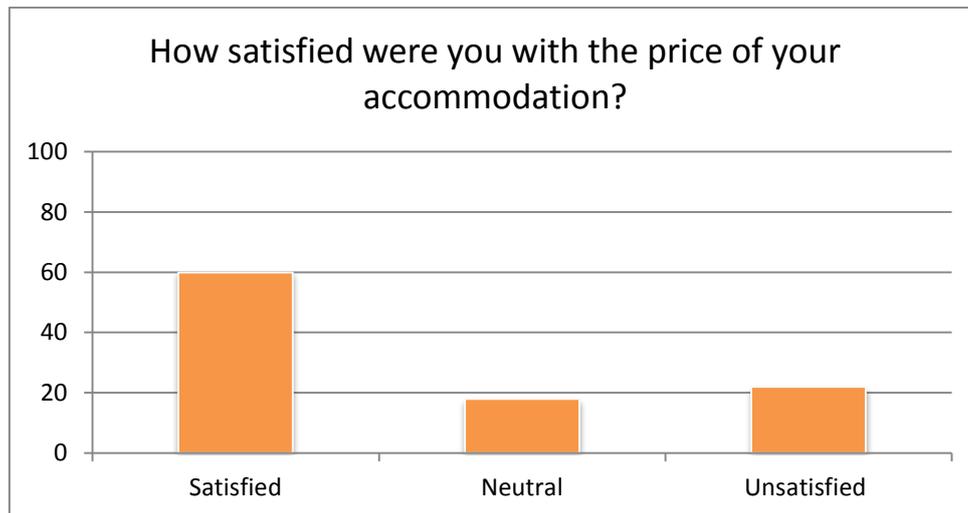

We are happy to see that the students who attended AU Summer University appreciate the park. 93 % of the students who answered the evaluation were satisfied with the outdoor surroundings.

Accommodation

AU Summer University offers you accommodation while you are here. The university has plenty of housing facilities located near the university, which means that students can either walk or rent a bike to get around in Aarhus. It is always a problem to find proper affordable accommodation in Denmark and in this light we are happy to see an overall satisfaction with the price of housing. The evaluation shows that out of the students who stayed at the dormitories, and also answered the evaluation form, 60 % were satisfied with the price.

Social programme

The AU Summer University team invites the students to take part in the social programme during their stay in Aarhus. The social programme is a chance to mingle with the other students and to relax a bit in the evening or weekends. The programme includes cultural and social activities such as a visit to the art museum ARoS, bowling or an evening in Tivoli. The evaluation shows, that out of the students who participated in the social programme and answered the evaluation, 92 % were satisfied with the activities they signed up for.
